

LESSON NOTE ON VISUAL ARTS

Topic: Two & Three dimensional works of art

Subject: Visual Arts.

Class: J.S.S 3

Lesson Teacher: Chilaka T. O.

What is dimension? Dimension refers to the measurement of objects bearing in mind their length, width & depth.

What is Two dimensional works of art? The two dimensional works of art are those art works which are done on flat surfaces only. They have the dimensions of width and length only.

Examples of two dimensional art works are:

- 1) Drawing
- 2) Painting
- 3) Graphics
- 4) Textile designing
- 5) All designs that are done on paper.

What is three dimensional works of

art? Three dimensional works of art are all art works that have length, width and depth/ thickness/height.

NOTE: In three dimensional works we bear in mind volume, mass, form and shape. Examples of three dimensional works of art are:

- 1) Sculpture
- 2) Ceramics
- 3) Architecture
- 4) Modeling
- 5) Construction
- 6) Carving
- 7) Casting

Answer these questions for me before we continue: Is your dad's car two or three dimensional art work? What is our school sign board?

The Differences between two and three dimensional works of art

- 1) The two dimensional arts works have only length and width while the three dimensional art works have length, width and depth.
- 2) The two dimensional arts are

done on flat surfaces only while the three dimensional works of art are done on shapes that have thickness e.g wood,clay, stone, iron etc.

3) The two dimensional arts are seen or viewed from only one side ie from front alone while the three dimensional arts have an all pleasing view ie they are observed from all sides.

Assignments:

1) Draw two shapes in your drawing books to show two and three dimensional shapes.

2) Answer all the questions in Your work book that deal on 2 dimensional and 3 dimensional art works(Design). Reference books for all our lessons are: **(1)Certificate Arts by Irein Wamgboje** and **(2) Arts for Junior Secondary Certificate by Anyiam George U.**
